J-700 Series
Friction Currency Counter

LAUREL
LAUREL BANK MACHINES CO.,LTD.

LAUREL has developed the most excellent and sophisticated Machines.

High-Performance J-700 Series Currency Counters

FEATURES

The LAUREL J-700 series Currency counters have superior cost performance. The variety of the product line assists customers to select the appropriate model to meet the demand. Choosing the appropriate model with the appropriate specifications is the way to the ideal cash-handling operation with the efficient cost reduction.

Easy Operation

The user-friendly machine, our J-700 Series has been designed to be simple enough for the easy operation. The operator can easily learn about the operation. And it is extremely simple to make changes on the various settings.

Accumulate Counting

The J-700 Series is equipped with accumulate counting sensor system. And it allows to count banknotes accurately regardless of the several conditions of the banknotes.

Reliable Authenticating Detection

The J-700 Series is equipped with newly-developed UV/IR/MG sensors, enhancing Authenticating Detection.

Highly selected components for high durability

The J-700 Series is comprised of durable and high quality parts can tolerate heavy usage.

Easy Maintenance

The mechanical structure and software control system of the machines allow for easy maintenance to keep high performance over a long period of time.

Color Universal Design *

LAUREL applied this concept when we started to design the color of indicator lights and the shape of operation buttons with colors. Accordingly, the J-700 Series has received the color universal design certification mark from the non-profit Color Universal Design Organization.

* Color Universal Design

There is variation in the way individuals perceive colors, and many people find it difficult to see certain hues. Therefore, color universal design seeks to ensure that information is properly conveyed to all people regardless of their color perception. (<http://www.cudo.jp>)

CS Function

Currency Select Function automatically selects the most suitable CF detection level for each currency.
